Q&A

Let's build something **right now**

to attach them

Build Chai Club, a chai café website and shop.

Attach

Public

Ask it to plan before it builds

This is what **one prompt** can become

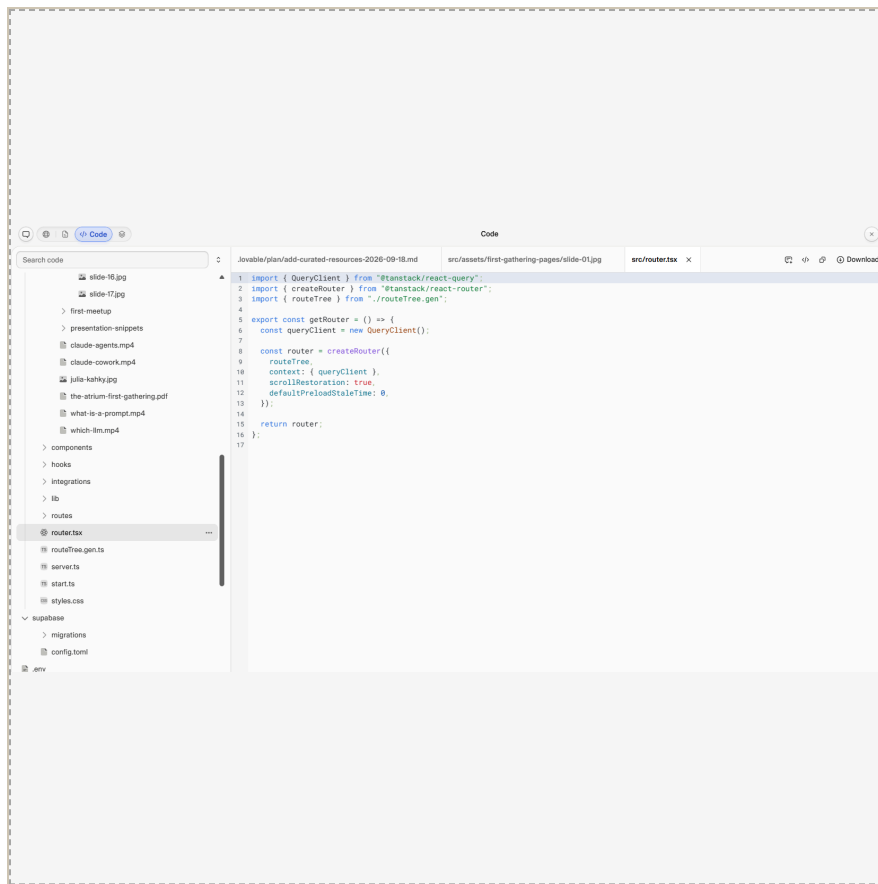

What one prompt gets you

A working front end

A back end, when you ask

A live link

Code you own

A good first prompt

”A client intake tool for a small consulting firm. A public form, an admin list, and a detail view with notes. Clean, black and white, one warm accent.”

PART 02

Build time

One small thing. One live link.

Before I plan this, a few quick questions to shape it.

Who should see the research section?

Just us (private)

How will research data get in?

Manual entry, CSV upload, AI summaries

Which commercial segments do you want to track first?

**Restaurants & hospitality, Healthcare & labs,
Manufacturing & industrial, Offices & property mgmt**

What city or region will the business serve?

Other: Austin

 **Plan**

Queue follow-up...

PART 03

Personal agents

AI that does the recurring work.

 Meta

A Personal Assistant for everyday life.

Instinct

The logo for dots, featuring the word 'dots' in a lowercase, sans-serif font where each letter is a different color (blue, yellow, pink, green).

WHERE TO START

Agents worth building

Good first agents

Morning briefing

Meeting prep

Inbox triage

The weekly report

Ones I've built

Health & fitness day planner

Trip planner

Cost saver

Reservation booker

BEFORE NEXT TIME

Your first agent this week

-
- 1 Pick a weekly chore
 - 2 Brief it like a new hire
 - 3 Let it draft, not send
 - 4 Bring what broke next time
